

March 2016

PERFORMANCE MEASURES

Statewide Transportation Operations Center

AECOM

 **MDOT**
Michigan Department of Transportation

The Statewide Transportation Operations Center (STOC) operates 24 hours a day, seven (7) days a week to monitor and manage traffic along the roadway system throughout five (5) MDOT regions. STOC operators utilize closed-circuit television cameras (CCTVs), dynamic message signs (DMS) and various other communication resources in order to receive and disseminate real-time traffic conditions to the motoring public.

Summary of Terminology

Communication – Any phone call, e-mail or radio transmission that comes into or goes out of the control room.

CRO – Control Room Operator

Event – A task in which a CRO is involved. Multiple categories of events exist (e.g., incident, construction, weather, or special event).

FCP – Freeway Courtesy Patrol

FCP Assist – Service provided to the motoring public for various incidents. Includes tire change, mechanical assist, provide gas, move debris, and traffic policing.

High-Impact Incident – Any incident that closes more than fifty percent of the freeway, closes both directions of an arterial, closes a freeway-to-freeway ramp, or a closure of less than fifty percent of the freeway/roadway but is also causing a significant delay.

Incident – An unplanned event that impacts the shoulder, lane(s) or a ramp of a state of Michigan trunkline (e.g., crash, vehicle fire, debris, or police situation).

Unique Message – Any message posted to the dynamic messages signs (DMS) that relate to an incident, construction, special event, weather condition or an AMBER alert.

Events by Type

*Other includes police situations, damage to MDOT property, maintenance, weather, AMBER Alerts, fire, special events, and other traffic impediments.

Incidents by Detection Source

Of the **522** incidents in March 2016, **64%** were detected by Freeway Courtesy Patrol.

*Includes notification from dispatch, Nixles, and Bay Alerts.

Construction Events

STOC CROs monitored and managed **16** construction events in March 2016.

Note: CROs can manage multiple construction events, such as intermittent lane shifts and configuration changes, for each construction project managed by the TSCs.

Communications by Region

CROs managed **4,412** notifications (phone calls, e-mails, radio transmissions) in March 2016, with the largest percentage of all communications, 39% (1,728) between the control room and **Bay Region**.

Assists by Type

*Other includes motorist sleeping, checking map, using cell phone, or medical emergency.

Average Assist Times

Dispatched vs. Found on Patrol

Of the 387 assists in March 2016, **86%** (332) were found while FCP drivers patrolled their routes.

The response and clear times for all FCP assists are logged by CROs. These numbers represent the average response and clear times for all drivers during the time periods shown.

STOC has two FCP drivers working on two routes: one driver working in the Brighton area of I-96 and US-23 and the other driver working in the Ann Arbor area of I-94, US-23 and M-14.

FCP Assists by Freeway

Freeway	Miles Patrolled	Total Assists	Assist Density (assists per mile)	Avg. Response Time (minutes)	Avg. Clear Time (minutes)
US-23	26.5	159	6.0	12.4	13.5
I-94	18	123	6.8	14.1	12.5
I-96	11	61	5.5	10.8	8.6
M-14	15.5	44	2.8	12.7	9.9
Totals/Averages	71	387	5.5	13.0	12.0

FCP provided the most assistance along **US-23** this month (**159 assists**). I-94 experienced the highest assists per mile (**6.8 assists per mile**).

Stuck in Traffic Notifications

Stuck in traffic notifications are sent to the Control Room via motorists using the Mi Drive mobile website or Mi Drive Application.

DMS Messages by Region

Of the **229** unique messages in March 2016, 56% of them were posted in the **University Region**.

DMS Messages by Type

Once a CRO receives notification and confirmation from stakeholders regarding a specific event, a message specific to the event location and event type will be sent to appropriate dynamic message signs (DMS).

STOC Events Displayed on the Mi Drive Website

Incidents by Freeway

Freeway	Miles	March 2016			February 2016			March 2015		
		Total Incidents	Incidents per Mile	Average Duration	Total Incidents	Incidents per Mile	Average Duration	Total Incidents	Incidents per Mile	Average Duration
I-475	17	0	0.00	0.0	1	0.06	1,471.0	3	0.18	89.3

M-14 *	23	45	1.96	11.7	76	3.30	19.6	121	5.26	21.8
US-127	165	8	0.05	59.8	13	0.08	28.5	6	0.04	29.3
US-131 *	91	3	0.03	35.7	5	0.05	99.0	4	0.04	50.3
US-23	93	167	1.80	24.1	148	1.59	17.7	178	1.91	17.6
US-31 *	85	3	0.04	494.0	3	0.04	141.0	4	0.05	222.8
Total/Averages	1,222	480	0.39	28.3	486	0.40	32.5	540	0.44	27.7

*These figures are discounted and do not include incidents on stretches of freeway managed by WMTOC, SEMTOC or BWBTOC.

Total Incidents

There were a total of **522 Incidents** in the month of March, **16 percent** of these were classified as high-impact.

A high-impact **Incident** is one that closes more than fifty percent of the freeway, closes both directions of an arterial, closes a freeway-to-freeway ramp, or closes less than fifty percent of the freeway/roadway but is also causing a significant delay.

Longest Duration Incidents

Location	County	Day	Duration	Details
NB & SB US-127BR between Pine Ave and Gratiot Ave	Gratiot	Wednesday, March 2	18,589 Minutes	Collapsed Building
NB US-23 at 8 Mile Road	Livingston	Thursday, March 10	1,388 Minutes	Bridge Hit
WB I-94 Exit Ramp to Red Arrow Highway	Berrien	Friday, March 11	1,113 Minutes	Crash
SB M-50 at Hamlin Street	Eaton	Wednesday, March 2	774 Minutes	Crash
NB US-31 at Snow Road	Berrien	Monday, March 7	751 Minutes	Semi Crash

The top duration **Incident** this month occurred along **US-127BR (Superior Street)** and lasted **18,589** minutes, compared to the average duration of **71.4** minutes (average of all STOC managed events).
